

The inflatable PVC cabin is designed for cleaning, disinfecting and decontaminating protective clothing contaminated with chemical substances. Three decontamination lines (cabins) allow for very quick operation – up to 3 persons can be decontaminated at the same time.

The design includes the following elements:

- Inflatable frame made of PVC coated fabric.
- Removable bottom attached to the bottom tube of the frame.
- Removable film curtain attached to top and side tubes of the frame.

The cabin's standard equipment includes a spray line with pressure supply hose; the line may be supplied by a pressure sprayer.

Technical parameters

Lenght	3,25 m / 2,79 m (±0,02 m)
Width	2,00 m / 1,54 m (±0,02 m)
Height	2,30 m / 2,07 m (±0,02 m)
Inner surface of the cabin	4,30 m ² (±0,01 m ²)
Weight of the cabins in the bag without accessories	~60 kg
