

Litex 680 is a compact RIB-type boat whose seakeeping abilities allow it to be used at sea. Is designed in a way that maximises its full potential. The size of the boat allows it to be transported by road, by a driver with a "B" category driving license. High stability of the boat guarantees its safety at sea. The tubes are made of Hypalon 1670 dtex, which guarantees strength of the boat and resistance to weather.

Its innovative hull design provides high load capacity. Litex 680 is a specific-purpose boat used for rescue operations and is tailored for the needs of the fire service. During transport, the pump can draw water and transmit it by hose to a tank or car. It is also possible to carry out fire-fighting operations directly from the boat. Litex 680 is compatible for transporting a pump. Thanks to a system of water suction it can draw in water while moving in water and transfer via a hose to a car or tank. It is also possible to carry out a firefighting operation directly from a boat.

Technical parameters

Overall length LOA	6,8 m
Overall width of RIB	2,5 m
Displacement	1,33 m ³
Weight (w/out engine)	460 kg
Maximum number of person	10
Maximum engine power	186 km
Overall length of deck	4,4 m
Overall width	1,5 m
Draft	0,4 m
Maximum load capacity	1410 kg
Minimum engine power	140 km
