

Mobile Camouflage provides multispectral mobile Protection VIS, NIR, TIR, RADAR.

- VIS specialised mobile camouflage pattern design dedicated to seamless integration with the natural environment providing effective protection from visual sensors and observation by the unaided and aided eye,
- NIR reflection properties effectively replicate the natural environment giving increased protection from noctovision devices,
- TIR reduction of thermal signature of up to 85%,
- RADAR two way attenuation of up to 30db (according to tests performed by WITI - Military Institute of Armament Technology Warsaw Poland),
- high tensile strength and resistance to tearing,
- light weight designs available,
- quick assembly and disassembly,
