

OBV 1 Overt Ballistic Vest 1:

- This bulletproof vest is designed for various Uniformed Forces.
- The principal design features include maximum protection and security of the user.
- The vest sheathing is made of top quality materials.
- The vest is designed for use in any weather and climate conditions.
- The outer part of the vest's sheathing is made of high-quality materials resistant to tearing and abrasion. It does not stain clothes, nor cause any allergic reactions.
- The inner side of the sheathing is designed and made of a combination of two types of breathable materials ensuring maximum thermal comfort for the user:
 - Spacer Mesh as the middle layer, ensuring proper circulation of the air
 - The outer elastic, breathable and wicking fabric covering the mesh
- The vest provides a large area of protection without compromising the maximum freedom of movement
- The vest can be adjusted with shoulder and side Velcro fasteners, which guarantee secure fastening and do not damage the clothing
- The vest features an internal elastic stabilizer belt ensuring that the user is able to adjust the vest configuration, so that the vest weight is distributed from the shoulders to the waist.
- Ballistic Resistance: the vest is available with various ballistic resistance configurations – depending on the requirements. For example: Class K2-O2 according to Polish Standard PN-V-87000:2011 or NIJ IIIA according to NIJ Standard 0101.04.
