

THIS PLATE CARRIER FEATURES a simple, lightweight design. With its dimensions and feather-like weight, it is a perfect solution as a basic vest for Police Officers and other Uniformed Forces representatives.

- The vest is designed to carry the minimum of two ballistic plates (front and rear) with the dimensions of 325 x 245 mm. The ballistic resistance level for the front and rear plates depends on the resistance class of the applied plates.
- The vest can be upgraded with additional pockets for side panels with dimensions 150 x 150 mm, attached via the PALS/MOLLE system. The ballistic resistance level for the side plates depends on the resistance class of the applied plates.
- The vest sheathing features mounting stripes compatible with the PALS/MOLLE system designed to carry equipment.
- The vest has an evacuation grip (at the back), which allows for evacuating the wounded/unconscious person.
- Adjustable shoulder straps and an adjustable side system in the form of straps and clasps ensure ergonomics of use.
- The main sheathing of the vest and additional equipment is made of durable, heavy-duty textile.
- In order to increase the thermal comfort of the user, the internal layer of the vest (closest to the user's body) is made of high-strength 3D spacing mesh, enabling air circulation under the vest.
