

The inflatable decoys make it possible to mimic operations, divert attention from real objects, draw enemy fire, and give false information about the size of forces, quantity, and quality of armaments. The presented product is a sample of Lubawa SA's manufacturing, technological, and conceptual capabilities.

The inflatable decoy imitates the signature of the Jelcz truck in the following spectra of detection:

- Visible
- Thermal
- Radar

The vehicle is built on an inflatable frame. The material used as the vehicle's body closely imitates the outer surface of the actual object.
