

PW-75 – a military backpack with 75 litre capacity, made of Cordura® 1100 fabric in Polish khaki camouflage design No. 93 with IRR finish (near-infrared invisibility). Exceptional durability and reliability in all, even the most extreme conditions are ensured by innovative construction solutions and high quality materials used for the production of the backpack.

Description:

- The backpack is manufactured on a 4 generation rigid "molle" frame, the frame is designed anatomically to the shape of the user's back, ensuring high comfort. The frame can be used as a transport platform, to which (if necessary) such items as cases, batteries or a spare wheel can be strapped and conveniently transported.
- High level of the backpack's functionality is achieved by placing on the front, sides and waist belt horizontal attachment straps compliant with PALS/MOLLE system designed to attach additional ammunition pouches and equipment.
- Wide harness and belt ensure full adjustment according to the user's individual needs, providing convenience and comfort. The harness is fitted with an additional shoulder belt.
- Main compartment with dimensions: 66 x 40 x 30 cm is closed by pulling a twine, an additional top compartment (also closed by pulling a twine) ensures tight closing. The main compartment has a partition, which makes it possible to divide the loading space inside the backpack. Access to the main compartment is also possible through a vertical splash-proof zip sewn on the front of the backpack, and through a lower semi-circle shaped flap, which is also closed by a splash-proof zip.
- The backpack is fitted with a shaped top flap with adjustable height. Inside the flap there are outer and inner pockets closed with a zip. At the top of the flap there are sewn-on straps designed to attach a foam mattress or a sleeping bag.
- On the outside of the backpack there are sewn on attachment straps compliant with PALS/MOLLE system, which allow the user to attach additional equipment. At the bottom of the backpack there is a system of attachment straps, which allow the user to attach additional equipment.
- The backpack is fitted with straps on zips to facilitate their opening when wearing gloves, straps ensure attenuation of the slides' noise. Side compression straps facilitate packing.
- On the front, the backpack has a flat pocket for maps or documents. At the top of the backpack there is a handle designed to easily carry the backpack.
- The backpack is equipped with two modular pockets with dimensions: 36 x 24 x 12 [cm] (capacity 11 l) each, attached by TOP OPEN zips, which make it possible to very quickly detach the pockets. The pockets are fitted with handles which allow it to be used as separate components. In addition, both pockets can be connected using a zip, creating a separate storage with 22 l capacity. Furthermore, the backpack is fitted with small pockets for various small pieces of equipment.
