

Charakterystyka:

- Designed for service-repair works in field conditions.
- Thanks to coated PCV and an automatic system of maintaining pressure in chambers the tent guarantees complete protection against adverse weather conditions in temperature ranges from -30°C to +50°C.
- The tent construction based on pneumatic frames allows it to be set up in all field conditions.
- The entrances of the tent situated in the headwalls facing each other enable vehicles to drive through without the need of reversing; in the position with completely lifted bays the gateway dimensions are equal to the tent's cross-sectional size.
- The tent with all equipment fits in a 20" container ISO1C.
- Used the military during peace missions in Afghanistan and Iraq.

Technical parameters

Floor space	148 m ²
Dimensions (length x width x height)	20,1 x 9,8 x 5,7 [m]
Weight	600 kg
Set up time	60 minutes
Number of person to set up	8
Transport	20" container
Frame	Pneumatic
Material	PVC coated polyester, waterproof and fire retardant
