

Example photos of the basic version of the sigma*

This bulletproof vest is designed for perfect fit to the user's body and ballistic protection from the front and rear, flexible soft ballistic inserts of the vest provide ballistic protection from the sides. It is an ultra-lightweight design specifically suited for special operations, aircraft flights or added security during events and meetings. It protects the user, and at the same time ensures total concealment, thanks to its sleek design and low profile.

KEY FEATURES:

- Protection against firearms bullets and fragments.
- Perfect solution for users seeking concealed protection, e.g. politicians, businessmen, government officials, etc.
- Designed, in particular, for concealed use close to the user's body.
- Maximum comfort of use is provided by top quality materials, e.g. silver-ion, anti-bacterial knit fabric from the inside, which reduces unpleasant odor, maintains the natural balance of the skin and ensures hygiene and freshness throughout the entire day.
- The anatomic design ensures maximum freedom of movement, providing an ultimate area of protection.
- Proven quality thanks to abrasion-resistant materials with colors that do not stain the outer clothes, and with allergy-free properties.
- The ballistic protection is available in two classes:
 - K2-O2, according to Polish Standard PN-V-87000:2011:
K2: bullet protection: 7.62 x 25 mm TT, weight 5.5 g, impact velocity 420 ±15 m/s.
O2: fragment protection: weight 1.1 g, impact velocity from 525 to 600 m/s.
 - K2-O3, according to Polish Standard PN-V-87000:2011:
K2: bullet protection: 7.62 x 25 mm TT, weight 5.5 g, impact velocity 420 ±15 m/s.
O2: fragment protection: weight 1.1 g, impact velocity from 600 to 675 m/s.
