

The **NS-9 tent** is a universal tent designed to accommodate users in field conditions and to isolate them from negative weather conditions. It is suitable to be operated in varied terrain and climate, including high air humidity and high sunshine (range of external temperature from -30°C to $+50^{\circ}\text{C}$). The NS-9 makes it possible to create separate inner zones for rest and work.

Features:

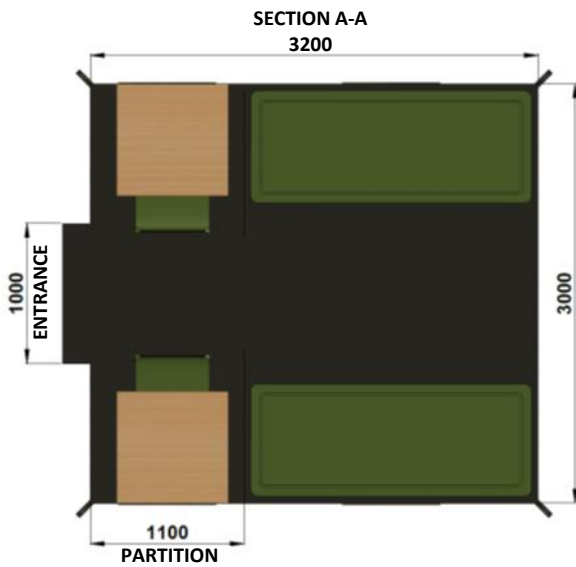

- **Frame:**
 - Circular cross-sectional steel profiles.
 - All elements are protected against corrosion.
 - Painted in solid colours, khaki or black.
- **Tent canopy:**
 - Made of polyester/cotton, flame retardant, fire retardant fabric in khaki colour.
 - The canopy elements are sewn together with a machine seal, which increases the durability and watertightness of the connections.
- **Inner liner:**
 - Made of polyester/cotton fabric, flame retardant, fire retardant, khaki in colour
 - It has tunnels for the distribution of cabling in the tent.
- **Floor:**
 - Made of polyester fabric, coated on both sides with a polyvinyl chloride based compound.
- **Tent:**
 - Permanently connected to the canopy in a way that increases watertightness.
 - Equipped with two 45 cm long, 45 cm diameter sleeves located in the lower corners of the canopy sidewalls for efficient connection of an external heater/air conditioner, electrical cables, increasing watertightness.
- **Optional additional equipment increasing tent's functionality:**
 - Tropic - made of polyester knitted fabric using a 3D spatial effect causing a random and irregular pattern, designed for use in temperate climates in forest camouflage, increases camouflage in visible light and near infrared, increases stability and strength of the entire structure.
 - Others - according to customer specifications.
