

The **Personal Patrol Tent 2T PRO** is a military, multifunctional, personal patrol tent designed for a variety of tasks requiring isolation from poor weather conditions. The tent is suitable for use in a varied terrain and climate, including high air humidity and high sunlight, outdoor temperature range from -30°C to $+40^{\circ}\text{C}$. It is designed for use by 2-3 people.

The PPT 2T PRO features a lightweight design and quick assembly/disassembly without the need for tools. The tent is made from the fabric that significantly increases the camouflage properties of the tent (VIS / NIR / Thermal).

It is possible to fit the Tent with an additional flysheet made from the knitted fabric, available in a variety of camouflage patterns.

Features of the Personal Patrol Tent 2T PRO:

- **Frame:**
 - Aluminium with flexible connectors.
 - Frame design for quick assembly/disassembly, no tools required.
 - All frame risers are the same length.
 - Field repairable.
- **Outdoor tent:**
 - Designed for intensive / daily use.
 - Machine sealed stitches to ensure watertightness.
 - Can be used with only the outer tent (no inner tent required).
 - Equipped with snow aprons to increase the level of watertightness in the event of extreme weather conditions.
 - Two entrances/exits located in the vestibules.
 - Dedicated vestibules for storing backpacks / equipment and for conducting covert observation.
 - The design ensures that the possibility of improper assembly is minimised and that the tent can be easily assembled during extreme weather conditions.

- **Inner tent:**
 - Made of fabrics identical to those used in the outer tent.
 - Floor made of ultralight polypropylene material.
 - Provides increased thermal comfort and additional isolation against extremely harsh weather conditions.
 - Equipped with attachment points for fixing lighting, clothes-drying lines, as well as multifunctional pockets and ventilation openings.
- **Additional floor:**
 - Made of the same fabric as the floor of the inner tent.
 - Can be used as the primary floor if the inner tent is not used.
 - Provides additional isolation when using the tent in difficult terrain.
 - Protects the floor of the inner tent from mechanical damage.

Technical parameters	
Length (inner tent)	2,15 m (±5 %)
Width (inner tent)	1,3 m (±5 %)
Height (inner tent)	1,3 m (±5 %)
Total area	2,8 m ² (±5 %)
