

Trailer for flood rescue is intended to carry out flood action with the equipment contained in it: flood barriers filled with water FB3L, manufactured by LUBAWA S.A. On the trailer there are all the tools and equipment necessary to position barriers in different area and weather conditions. A trailer can be ordered in several versions – in different capacities and sizes, to meet the customer's needs, as well as to the vehicle, by which is to be transported.

#### The proposed equipment:

- Flood barriers FB3L 70 for 150 segments (depending on trailer load, one barrier weighs 11 kg).
- Floating pump of capacity of approximately 1,000 l/min.
- Discharge hoses W52 and W75, 4 pieces.
- Ball distributor.
- Power generator.
- Digital generator light tower with two heads.
- 10l canister for petrol.
- 4 passenger ORKA motorboat.
- Overall to work in water.
- Trousers to work in water.
- Safety vests.

#### Advantages:

- Quick transport to the threatened place.
- Quick installation of several-hundred-meter flood barrier (time of position of one barrier of 10 linear metre is approximately 5 minutes; can replace 170 sacks with sand).
- All tools required to carry out the flood action are in one place.
- Possibility to carry out actions on day and at night.
