

The PCPL Plate Carrier is a tactical vest that allows for installing hard ballistic plates or dedicated soft ballistic inserts, depending on the type of operations and required ballistic protection levels. The design features a PALS/MOLLE system that allows the user to customize the vest to the individual needs and the type of equipment used in action.

#### KEY FEATURES:

- An evacuation grip (on the back) designed to facilitate the evacuation of a wounded or unconscious person
- Enhanced ergonomics in the form of:
  - Adjustment straps to fit the vest to the user's body figure
  - Special design to transfer some of the vest's weight to the hips of the user
  - Shoulder comfort pads featuring spacer mesh on the inside
  - Detachable cummerbunds with ROC buckles
- The main sheathing of the vest is made of high-strength fabric, with spacer mesh on the inside to enable air circulation under the vest, increasing thermal comfort.
- The vest is designed for year-round use in all weather conditions, it maintains constant protective and operational parameters in the temperature range from -40°C to +50°C.

#### Note!

**The sheathing of the PCPL Plate Carrier does not provide ballistic protection without the use of ballistic inserts or plates, and the level of ballistic protection of the vest depends on the protection class of the ballistics used.**

#### Protection areas:

**The protected areas of the vest result from the inserts or ballistic plates used at the front and back of the vest.**
